Atlanta, GA (Open to relocation) | (943) 241-3640 | munawwaradam@gmail.com | [linkedin.com/in/manwar99](https://www.linkedin.com/in/manwar99) | munawwaranwar.com

SUMMARY

M.S. Computer Science graduate from Emory University with hands-on experience in SQL query optimization, Python-based data validation, and ETL pipeline development. Skilled in translating raw data into actionable insights through Power BI, Tableau, and PostgreSQL. Comfortable working across the full analytics stack from data ingestion to business-facing reporting.

EDUCATION

Emory University Atlanta, GA
Master of Science in Computer Science | GPA: 4.00/4.00 August 2024 - December 2025

Habib University Karachi, Pakistan
Bachelor of Science in Computer Science (Minor: Mathematics) | GPA: 3.85/4.00 August 2018 - June 2022

PROFESSIONAL EXPERIENCE

ABM Industries Atlanta, GA
Data Analyst Intern June 2025 - August 2025

- Migrated 2 FP&A Oracle Fusion queries to Azure SQL, cutting runtime from 60 to 30 minutes and saving 3 hours per close cycle, by converting PL/SQL to T-SQL and applying indexing optimization.
- Validated 200K financial records, reducing mismatches from 12K to 1.5K and improving executive reporting accuracy, by writing Python validation scripts and SQL reconciliation logic during Oracle-to-Azure SQL migration.
- Reduced policy lookup time from 30 minutes to under 5 minutes for operations teams, saving 20 hours monthly, by building an automated Q&A system from 30 SOP documents using Python parsing and Azure OpenAI.

Habib University Karachi, Pakistan
Research Assistant - Computer Science July 2022 - July 2024

- Constructed 34 Python and SQL lab assignments, reducing grading time from 15 to 10 minutes per submission and cutting TA workload from 8 to 4 hours weekly for 100+ students, by developing reusable rubrics.
- Facilitated weekly 3-hour labs for 30+ students, reducing completion time from 120 to 90 minutes and enabling 80%+ in-session completion, through hands-on instruction and personalized debugging support.
- Mentored 10 Deep Learning research projects resulting in 2 IEEE conference acceptances, by providing weekly code reviews and methodology guidance.

Ismail Industries Karachi, Pakistan
IT Intern July 2021 - August 2021

- Streamlined security log analysis, reducing alert review time from 5 hours to 1 hour, by converting 100K+ daily Trend Micro logs into structured CSVs using Python automation and an ETL pipeline into SQL Server.
- Built a Power BI dashboard from SQL Server data, reducing reporting time from 2 hours to 10 minutes and enabling IT leadership to implement timely policy updates through interactive visualizations.

PROJECTS

Automated Weather ETL Pipeline | (Python, SQLite, GitHub Actions) December 2025 - January 2026

- Eliminated 1.5 hours of daily manual data collection by automating weather ingestion from a public API every 10 minutes into SQLite across 5 cities, using Python and GitHub Actions for scheduling and monitoring.

NYC Taxi Analytics Platform | (Python, PostgreSQL, Flask, React, ETL) August 2025 - December 2025

- Engineered PostgreSQL analytics platform reducing fare and demand analysis from 7 hours to 15 minutes by ingesting 20M+ taxi records through Parquet ETL, Flask API, and React dashboard.

Gender Wage Gap Analysis Platform | (Python, D3.js, JavaScript) January 2025 - April 2025

- Designed gender wage gap analysis platform, reducing analysis time from 1.5 hours to 15 minutes by processing 344K records and enabling disparity exploration by age, education, and occupation using Python and D3.js.

TECHNICAL SKILLS

Languages: SQL, Python, R, JavaScript

Python Libraries: Pandas, NumPy, Matplotlib, Scikit-learn

Data Visualization: Power BI, Tableau, D3.js, Plotly, Excel (Advanced)

Analytics: KPI Development, A/B Testing, Statistical Analysis, Regression, Forecasting, Hypothesis Testing

Data Engineering: ETL/ELT Pipelines, Data Modeling, Data Warehousing, API Integration

Databases: SQL Server, PostgreSQL, MySQL, SQLite, MongoDB

Cloud: Azure (Azure SQL, Azure OpenAI), AWS (S3, Athena, Glue, QuickSight), GCP (BigQuery)

Tools: Git, GitHub Actions, Jupyter Notebook
