EDUCATION

Emory University

Master of Science in Computer Science | GPA: 4.00/4.00

Atlanta, GA

August 2024 - December 2025

Relevant Coursework: Database Systems, Machine Learning, Information Visualization, Data Mining, Data Privacy & Security

Habib University

Bachelor of Science in Computer Science (Minor: Mathematics) | GPA: 3.85/4.00

Karachi, Pakistan

August 2018 - June 2022

PROFESSIONAL EXPERIENCE

ABM Industries

Atlanta, GA

Data Analyst Intern

June 2025 - August 2025

- Migrated AR Cash Received and AR Aging FP&A queries from Oracle Fusion to Azure SQL, reducing query runtime by 50% and saving 3 hours per close cycle, enabling the data team to build downstream financial dashboards, by converting PL/SQL to T-SQL and applying indexing optimization.
- Validated 200K financial records during Oracle-to-Azure SQL migration, reducing data mismatches from 12K to 1.5K and improving accounts receivable reconciliation accuracy, by developing Python validation scripts and SQL reconciliation logic.
- Built an Azure OpenAI-powered Q&A prototype over 30 SOP documents using Python parsing, reducing policy lookup time from 30 minutes to under 5 minutes in internal testing.

Habib University

Karachi, Pakistan

Research Assistant - Computer Science

July 2022 - July 2024

- Designed and validated lab curriculum for Database Systems across two semesters, covering relational modeling, query optimization, and schema design for 30+ students per cohort, including pre-solving all assignments to identify edge cases before distribution.
- Developed assessments for Algorithms, Data Structures I/II, and Nature of Computation, requiring formal correctness validation and edge case analysis on each problem set prior to student release.
- Built and evaluated coursework for Deep Learning (two semesters) and an inaugural LLM course, maintaining technical currency across transformer architectures and prompt engineering methods.
- Contributed to research design and weekly code reviews across 10 Deep Learning projects, resulting in 2 IEEE conference acceptances including a Best Paper Award.

Ismail Industries Limited

Karachi, Pakistan

IT Intern

July 2021 - August 2021

- Converted 100K+ daily Trend Micro security logs into structured CSVs using Python automation and loaded into SQL Server via ETL pipeline, reducing alert review time from 5 hours to 1 hour.
- Built a Power BI dashboard from SQL Server data, reducing reporting time from 2 hours to 10 minutes and enabling IT leadership to implement timely policy updates.

PROJECTS

Card Transaction Analysis Dashboard | (Microsoft Excel)

March 2026 - April 2026

- Built an Excel-based dashboard tracking \$38.6M in spend across 55.7K transactions, using PivotTables, slicers, timeline filters, and KPI cards to surface fraud patterns, category performance, and weekly transaction trends.

NYC Taxi Analytics Platform | (Python, PostgreSQL, Flask, React, ETL)

August 2025 - December 2025

- Engineered a normalized PostgreSQL analytics platform ingesting 20M+ taxi records through Parquet ETL, a modular Flask REST API, and an interactive React dashboard, reducing fare and demand analysis from 7 hours to 15 minutes.

AI Learning Effectiveness Study | (Python, Pandas, Matplotlib, Statistical Analysis)

January 2025 - April 2025

- Investigated ChatGPT and interactive visualizations as AI learning tools across 36 participants, finding interactive visualization yielded 27% higher knowledge gains by applying paired and independent-samples t-tests on pre/post-test scores.

Gender Wage Gap Analysis Platform | (Python, D3.js, JavaScript)

January 2025 - April 2025

- Designed an interactive D3.js platform processing 344K wage records across 6 demographic dimensions spanning 32 years, reducing manual analysis from 1.5 hours to 15 minutes.

TECHNICAL SKILLS

Languages: SQL, Python (Pandas, NumPy, Matplotlib, Flask), JavaScript

Databases: PostgreSQL, Azure SQL, Oracle Database, SQL Server, MongoDB

Data Engineering: ETL Pipelines, Data Modeling, Data Warehousing, API Integration, Query Optimization, Data Quality

Data Visualization: Tableau, D3.js

Business Intelligence: Power BI, Excel (PivotTables, Power Query, XLOOKUP, INDEX/MATCH), Dashboard Building

Analytics: Statistical Analysis, A/B Testing

Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code, Postman
